We are pleased to invite you to the International Women's Day by Google's Women Techmakers. The conference is organized by Laurence de Villers and Annie Caron in collaboration with the Montreal Android GDG. The event will take place on March 12th 2016 at the École de technologie supérieure in Montreal.

Women Techmakers is a program created by Google to celebrate International Women's Day and to highlight the talent of women in technology. This year, we decided to organize the first edition in Montreal as part of the special event "The Women Techmakers Global Event Series Celebrating International Women's Day" (WTM IWD), which has seen more than 200 global events across 52 countries. This community building initiative promotes talented and passionate women and increases the visibility of the Montreal tech community while honoring women in technology.
